I. Solicitation Overview

1) Port Overview

The Harbor entrance is 48 ft. deep and the shipping channel is 38 ft. deep. The port contains 9 deep draft berths. 15 percent of Humboldt Bay’s 33 miles is considered appropriate for harbor facility development. State Route 299 is STAA truck approved and US Highway 101 south is STAA approved with the exception of approximately 10 miles. Redwood Marine Terminal I cargo handling facilities are currently in disrepair. The federal Navigation channel at Redwood 1 terminal currently is established at 38 ft. depth. An approximately 6.3 acre 1100 ft. length berth, wood dock, with approximately 75 acres of industrial land (41 acres Harbor District and 34 acres adjacent willing property owner), 2 warehouses, and a 2 ton crane. It is currently being used for various purposes including aquaculture and fisheries storage. These uses will be required to be relocated to acceptable locations prior to constructing new facilities. The long-term goal for the terminal is to repurpose the area into a
Multipurpose Marine Terminal to support the proposed offshore wind energy development which is proposed by the federal Bureau of Offshore Energy Management (BOEM) 30 miles offshore of Humboldt Bay and other maritime industries.

The port was classified as a potential Quick Reaction Port (QRP) for Offshore Floating Wind “OFW” and Marine Hydrokinetic (MHK), a potential fabrication and construction port for offshore floating wind and marine hydrokinetic, and an assembly port for offshore floating wind Semi-Sub and Tension Leg Platform “TLP”, and marine hydrokinetic by BOEM.

The port’s biggest assets related to offshore floating wind and marine hydrokinetic development (land, no air draft restriction, and navigation channel geometry, proximity to the ocean), show that assembly and quick reaction facilities are feasible with some significant facility upgrades. Anchor handling tugs, bulk carriers, and other offshore construction vessels can also potentially be accommodated, but may require upgrades to upland facilities such as crane capability. Offshore floating wind assembly could be conducted quayside of Redwood Marine Terminal I if new purpose built facilities such as construction of a new concrete wharf. The site also has the potential for marine hydrokinetic construction and assembly with wharf upgrades (bearing capacity, crane).

The Redwood Marine Terminal I property has additional heavy industrially zoned land directly adjacent to the Districts property that are also potentially available for lease. An overview of the Port and Site(s) are included as Exhibit B.

2) Solicitation

The Port is soliciting proposals for the development, use, and occupancy of Redwood Marine Terminal I (the “Site”).

The Port anticipates that the Site will be available for rent immediately. The Port will consider all proposed durations of term for use and occupancy of the Site; however, the Port is limited by the California Tidelands Trust law to a maximum term of duration of 66 years for any property rental agreement.

It is anticipated that the Board of Humboldt Bay Harbor, Recreation, and Conservation District will consider awarding an agreement to occupy and use the Site to the successful Proposer(s). This agreement may take the form of a option to lease agreement or other property rental agreement (collectively referred to herein as “lease”). Key lease provisions are provided as Exhibit A.

All Proposers must comply with the terms and conditions set forth in this RFP.

3) Solicitation Goals

The Port’s goals for the Site are as follows:
a) Develop a new multipurpose terminal and associated facilities to support the offshore floating wind industry and other maritime uses.
b) Increase maritime commerce and utilization of the Site
c) Maximize the indirect economic benefit from Port operations to the surrounding local community and region; and
d) Secure business that supports, enhances, or diversifies current maritime operations, and is compatible with the Port’s maritime operation;
e) Maintain and enhance environmental protection and the region’s quality of life;
f) Maximize revenues from the use and operation of the Site;
g) Relocate the existing aquaculture and commercial fishing storage areas to better facilities
h) Comply with and support the Port’s policies.

4) Condition of Property and Future Improvements

The successful Proposer must be prepared to take possession and use of the Site in its “as-is, where-is, with all faults” condition, including without limitation, environmental compliance and with the existing cranes in place on the Site.

The Proposer will be responsible for all capital improvements, including without limitation the construction, financing, and maintenance of all such improvements. The Proposer will be responsible for obtaining all applicable permits and other entitlements for such improvements.

The Port expects to designate the Shortlisted Proposer(s) approximately one month following the RFP submission deadline. N. Withdrawal or Modification of Offers
The Respondent may modify or withdraw an offer in writing at any time before the deadline for submission of an offer.

The Board of Port Commissioners (Board) may then ratify the Executive Director’s (or his/her designee’s) recommendations or conduct such further review of the protest, as
the Board may determine. The Board will render a final determination and
disposition of a protest by taking action to adopt, modify or reject the disposition
of a protest. Action by the Board relative to a protest shall be final and not
