

PROJECT OVERVIEW

CALIFORNIA'S WEST COAST OFFSHORE WIND PORT

Humboldt Bay is the only port in California designated as a good candidate for the various components of offshore wind infrastructure and operations (i.e., Staging & Integration (S&I), Manufacturing/Fabrication (MF), and Operations & Maintenance (O&M)) per "California Floating Offshore Wind Regional Ports Assessment" (BOEM, January 2023). See map to right.

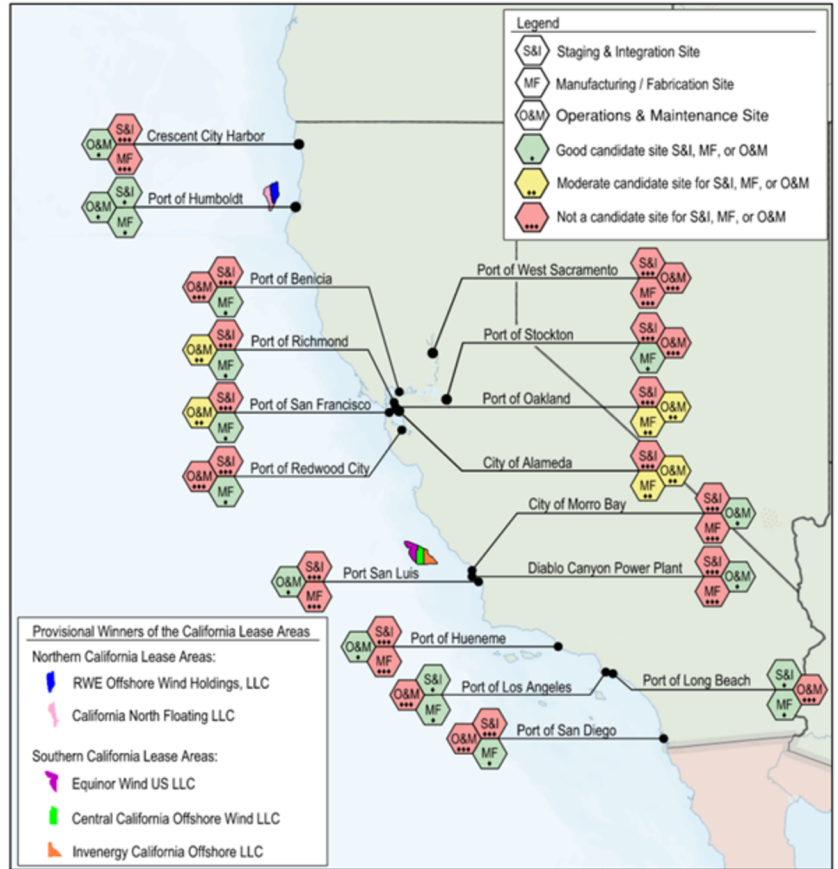

Humboldt Bay is centrally located to current/future West Coast BOEM offshore wind lease areas and is the closest port to the best wind resources in California.

Federal navigation channel is 38 feet deep & >450 feet wide, with no bridges or vertical draft restrictions.

Humboldt Port Authority has prepared a project concept for a 180+ acre site. The California Energy Commission granted \$25.45 M to District to advance the proposed project.

CEQA NOP was released in June 2023 and is scheduled to be re-released in August 2026. The Draft Environmental Impact Report is scheduled to be released for public comment April/May 2027. Permit applications are also scheduled to be submitted at that time.

An additional 300 to 600+ acres of available Coastal Dependent Industrial lands exist within Humboldt Bay with direct access to the navigation channel. These additional sites have the potential to serve offshore wind port development (i.e., S&I, MF and O&M).

OPPORTUNITIES TO LEARN MORE AND PARTICIPATE IN THE PROCESS

COMMENT ON THE CEQA NOTICE OF PREPARATION (NOP)

AUGUST 2026 (30 day comment period)

Submit your written comments during the public review period for the CEQA Notice of Preparation.

ATTEND BOARD OF COMMISSIONERS MEETINGS

SECOND THURSDAY OF EVERY MONTH AT 6 PM

Attend the Harbor District's Board of Commissioners meetings for project updates (i.e., design, CEQA process, permitting process, schedule updates, etc.).

COMMENT ON THE DRAFT ENVIRONMENTAL IMPACT REPORT (CEQA)

APRIL / MAY 2027 (45 day comment period)

Submit written comments and attend public hearing during the public review period for the Draft Environmental Impact Report.

VISIT THE PROJECT WEBSITE

Find documents, meeting schedules, and updates on public comment opportunities as they become available.
